Independent claims 1, 9, and 13-14, are directed towards a method and system for decoding a bitstream "...generating a first signal comprising said non-I\_PCM mode macroblocks and a second signal comprising said I\_PCM mode macroblocks using a parser, said parser parsing the common slice in said bitstream, including parsing a first syntax element indicating an end of said slice and a second syntax element representing said I\_PCM mode macroblocks, said first or second syntax element following an entropy coding termination; (C) generating a third signal using a decoder, said decoder entropy decoding said first signal; and generating a video signal by combining said second signal and said third signal... which are features that are not anticipated nor obvious over the art of record. Dependent claims 3-8, 10-12, 16-32 are allowed for the reasons concerning the independent claims.
